

Minutes from previous meeting

29.05.2024

Client:

Frank de Lepper

f.delepper@fontys.nl

Location	R10 2.60
Starting time	13:30
Duration	30min
Ending time	14:00

Team:

Nyambe Imasiku - 525792@student.fontys.nl

Samuil Kozarov - 527531@student.fontys.nl

Ivan Anastasov- 525948@student.fontys.nl

Alex Mazilu - 525933@student.fontys.nl

Meeting Leader:

Nyambe Imasiku - 525792@student.fontys.nl

Secretary:

Ivan Anastasov- 525948@student.fontys.nl

Topics:

1. Introduction
2. Demonstration on the new features that have been implemented:
3. Expectations for the database
4. Conclusion

Summary:

Introduction:

1. Approving the meeting minutes from last meeting (22.05.2024):
everything was correct

Demo:

1. Web Mark Unavailability:

1. Text is unreadable, the background colour or the text colour will be changed.
2. The employees should also be able to mark available for days that are marked unavailable.
3. Let the employees mark availability for as long as they need in the future, but lock it for the time that the manager generated the schedule

2. Desktop Check-in and Check-out:

1. It should display a different message when the person clocks out
2. The system should be made as a separate application that starts up immediately when the computer starts
3. The time of the clock in/out should be displayed

3. Desktop Automatic Scheduling Generator:

1. Indicate all employees that are not allowed to work according to automated rules - mark the background behind their name with a different colour so it can be easily seen that there is a difference
2. Notify the manager with a list of all days and shifts that don't have enough employees
3. The time to generate the schedule is good, as long as it doesn't take hours

4. Desktop Manager Restocking:

1. Adjust the font colour of the add to basket button to be more visible

Database:

1. Database should be populated with at least 1000 employees
